Finding projects that need listing services

Prepared by web3talks.

Finding projects that need listing services requires a mix of **proactive data tracking** and **community networking**. Since listing on a Centralized Exchange (CEX) is often the second major milestone after a token launch, you need to catch projects during their "growth phase" after they have launched on a Decentralized Exchange (DEX) but before they hit major platforms like Binance or OKX.

Here is a strategic framework to discover these leads.

1. Monitor "Newly Added" Data Aggregators

Projects usually seek CEX listings once they have proven volume on-chain. You can find these "rising stars" by monitoring:

- **DEX Screener / DEXTools:** Look for tokens with high 24-hour trading volume ($1M+) and a high number of holders that are *only* traded on Uniswap, Raydium, or PancakeSwap. These are prime candidates for their first CEX listing.
- **CoinGecko / CoinMarketCap:** Check the **"Recently Added"** sections daily. These projects are often looking for the next step in visibility.
- **Basescan / Solscan:** Track new token deployments. If a project has a strong "social score" (active Twitter/X and Telegram) but is not yet listed on a top-50 CEX, they are a lead.

2. Track "Launchpads" and IDO Calendars

Projects that have just finished a fundraising round (IDO/IEO) are almost always in immediate need of listing services to provide liquidity for their investors.

- **Platforms to watch:** Polkastarter, DAO Maker, Seedify, and CoinList.
- **Strategy:** Reach out to projects listed in the **"Upcoming"** or **"Completed"** sections of these launchpads. They usually have a "Listing" item on their roadmap for the current or next quarter.

3. Use Social Listening Tools

Crypto founders and "Business Development" (BD) leads often hang out in specific digital hubs.

- **X (Twitter) Advanced Search:** Search for keywords like *"listing on CEX," "looking for market makers,"* or *"exchange integration."*
- **Telegram "Shilling" Groups:** While many are spam, groups like *Crypto Box Shilling* or *ICOlisting* (see below) host founders looking for exposure.
- **LinkedIn:** Search for "Founder," "CEO," or "Head of BD" at "Web3" or "Blockchain" companies. Many projects hire these roles specifically to handle exchange relations.

4. Networking in Specialized Telegram Groups

There are specific "behind-the-scenes" groups where listing agents and project founders connect.

> **Note:** Many of these are private or "Alpha" groups, but you can find public entry points:

- **Search for:** "Web3 Founders," "Crypto Project Networking," or "CEX Listing Discussion" in the Telegram search bar.
- **Direct Outreach:** Join the Telegram groups of tokens you find on DEX Screener. Look for the "Admin" or "CM" (Community Manager) and ask for the BD lead's contact.

Comparison of Lead Sources

Source Type	Timing	Quality of Lead	Effort
DEX Screener	Real-time	High (proven volume)	High (lots of noise)
Launchpads	Pre-listing	Very High (funded)	Medium
Twitter/X Search	Early stage	Varies	Low (can automate)
DEX-only Tokens	Mid-stage	High (ready for CEX)	Medium

Pro-Tip: The "Value-First" Outreach

Founders are bombarded by "listing agents." To stand out, don't just ask if they need a listing. **Identify a gap first:**

1. Check if their volume is high enough for a specific Tier-2 exchange (like MEXC or Gate.io).
2. Check if they have a Market Maker (MM).
3. Message them with a specific insight: *"I noticed your daily volume on Raydium is $2M, which qualifies you for [Exchange X]. Would you like an intro to their listing team?"*

SOME OUTREACH TEMPLATES

To stand out, your outreach needs to look less like a "sales bot" and more like a strategic consultant OR business developer. Founders receive hundreds of "Hey, I list you on Binance" messages; you win by showing you've done your homework.

Here are three templates ranging from "The Networking Approach" to "The Direct Insider."

Option 1: The "Data-Driven" Approach (Best for DEX leads)

Use this when you find a project on DEX Screener or DEXTools with high organic volume.

Hi [Name/Founder/Project Name],

I've been tracking [Project Name] on [DEX Name] over the last few days, congrats on hitting $[Volume Amount] in 24h volume. With your current holder count and social engagement, you're at a clear tipping point for Tier-1/Tier-2 exchange visibility.

I work as a listing agent at Weex and specializes in streamlining the listing process for projects such as yours. We focus on ensuring projects don't just "get listed," but maintain the liquidity requirements needed to stay there.

Would you be open to a brief chat about your listing options? I'd love to share some insights on the current requirements for weex exchange.

Best regards.

Option 2: The "Problem Solver" Approach (Best for LinkedIn/Twitter)

Use this for projects that have just finished an IDO or are looking to grow.

Hi [Project Name],

I caught the recent update regarding your [IDO/Product Launch]. What a great progress.

I'm reaching out because many projects at your stage run into the "listing bottleneck"; long wait times and high market-making costs. I help bridge that gap by facilitating direct

intros to listing committees and advising on volume/liquidity optimization to meet CEX standards.

Are you currently looking to expand beyond DEXs, or is the focus purely on product for now?

Cheers,

[Your Name]

Option 3: The "Short & Casual" (Best for Telegram DM)

Use this when messaging an Admin or BD lead in their official Telegram group.

Message:

"Hey [Project Name], I'm a listing consultant working with weex exchange. I've been following [Project Name] and think you guys are a great fit for a Weex exchange application given your current on-chain stats. Who is the best person on your team to chat with about exchange relations and BD?"

3 Rules for High Response Rates

1. **Never lead with a price: If you mention "listing fees" in the first message, you will be marked as a scammer. Focus on the intro and the strategy.**
2. **Name-drop specific stats: Mentioning their exact 24h volume or "Holder Count" proves you aren't just copy-pasting to 1,000 people.**
3. **Identify the "Gatekeeper": On Telegram, always ask "Who is the best person to speak with?" rather than pitching the first person you see.**
